Supervised by: Paul Barry

CLOUD BASED WEB-APP PROJECT

Encrypted clinical data
management
application

Iteration Goals

Meet with potential application user

Build out the necessary database tables

Functionality to allow a user to read, insert, update and delete

- » MySQL Workbench
- » PyMySQL
- » Shortage of time from previous iteration
- » Login System?

Current Status:

5

Patient Form

Surname

First Name

Address

Contact Number

Gender

Next of kin

Status

Currently holding a medical card?

Yes

No

Confirm

Cancel

Pharmacy Form

Pharmacy Name

Address

Contact Number

Fax

E-mail

General Practitioner Form

Title
Dr.

First Name

Surname

Address

Contact Number

E-mail

Plans for iteration three:

7

Moving forward:

Quickly build out the tasks I haven't accomplished this sprint

To come:

Patient Treatment Protocol module

THANKS!
